Community Investment Grants Program
2018 Highlights

Culture –
“The new energy that has gathered around this initiative in the last year has been a key component in my introduction to the arts community in Regina. The gallery has given me the opportunity to show work in a professional setting and connect with other artists in the city.”

Sport & Recreation –
“This is the 2nd session that my daughter has participated in the program. The sports skills she has gained and, more importantly, the social skills she has gained are amazing. Her 1st session she wouldn’t enter the gym without crying and now she runs in excited to play!”

Social Development –
“I really appreciate that this initiative is starting a discussion that needs to happen. I have been diagnosed with severe anxiety, and with depression as well. This presentation for a workplace is great, because it allows people like me to talk to co-workers or supervisors, to let them know what is going on, so that there is understanding.”
