Big Move Three: Net-Zero New Construction

All provinces have agreed to adopt the Government of Canada’s net-zero energy-ready building code for new residential builds by 2030. This makes planning for net-zero homes a necessity over the next decade, but there are also benefits to acting sooner. Regina is expected to grow significantly over the next decade, and encouraging net-zero new construction now means that fewer new buildings will be contributing to GHG emissions in the community, and fewer buildings will need to be retrofitted in the future. As buildings and building systems are long-lasting assets, choices made today will impact emissions in the community for decades to come and will either increase or decrease the burden on future generations. Increasing the proportion of net-zero builds over time can also prepare the workforce now for changes that will impact the whole industry by 2030. Other benefits include improved air quality as emissions decrease and lower utility bills associated with net-zero homes.

Net Zero Energy Ready (NZER) is a highly energy-efficient building that minimizes energy use such that on-site or community renewables or energy from a clean grid can be used to reach net-zero energy.

Net Zero Energy (NZE) is a building that uses an enhanced building envelope, solar orientation, and high-efficiency equipment to produce as much clean energy as it uses over the course of a year².

City in Action: Fire Station No. 4

The City of Regina Fire Station No.4 has received LEED Gold Certification. The project received 40 LEED points through its incorporation of a range of environmental initiatives including solar water heating, sun screens, and a glazed hose tower that doubles as a passive ventilation shaft to aid in cooling the building.

### Big Move Three: Net-Zero New Construction Actions

<table>
<thead>
<tr>
<th>ACTION</th>
<th>GREENHOUSE GAS (GHG) IMPACT</th>
<th>CO-BENEFITS</th>
<th>COST</th>
<th>IMPLEMENTATION MECHANISMS</th>
<th>TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 All new residential construction is net-zero by 2030</td>
<td>Low: &lt;1,000 ktCO2e</td>
<td>Equity: Enabler</td>
<td>$$$$$</td>
<td>Policy: Create incentives for developers choosing net-zero buildings.</td>
<td>Start: Immediately Completion: 100% by 2030, ongoing after 2030</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Employment: Medium</td>
<td></td>
<td>Initiative: Create a net-zero neighbourhood.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Cost Effectiveness: High</td>
<td></td>
<td>Program: Educate developers and builders on new building-code requirements and opportunities.</td>
<td></td>
</tr>
<tr>
<td>3.2 All new ICI buildings are built to National Energy Building Code</td>
<td>Low: &lt;1,000 ktCO2e</td>
<td>Equity: Enabler</td>
<td>$$$$$</td>
<td>Program: Net-zero commercial and industrial buildings.</td>
<td>Start: Immediately Completion: Ongoing</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Employment: Medium</td>
<td></td>
<td>Program: Educate developers and builders on new building-code requirements and opportunities.</td>
<td></td>

</tbody>
</table>

**CO-BENEFITS**

**EQUITY**
- **Enabler:** No discernible direct effect, but positive outcomes may occur in concert with other actions
  - **Low:** May favour certain groups or create greater disparity
  - **Medium:** More likely to be implemented fairly, but existing powerful groups may still be at an advantage
  - **High:** Contributes to enhanced equity

**EMPLOYMENT**
- **Enabler:** Enables employment
  - **Low:** 0 – 5 person years of employment per $million invested
  - **Medium:** 5 – 10 person years of employment per $million invested
  - **High:** >10 person years of employment per $million invested

**COST EFFECTIVENESS**
- **Low:** This action will have a net cost
- **Medium:** This action will break even
- **High:** This action will have a net return/benefit.

**COST**
- $$$$$ < $1 million
- $$$$$ $1 million – $100 million
- $$$$$ $100 million – $500 million
- $$$$$ $500 million – $1 billion
- $$$$$ > $1 billion
