

Reduce Energy at Home

Improving energy efficiency in your home is an effective way to save money, make your home more comfortable and take action to help Regina become a renewable, net-zero city by 2050.

Energy Efficiency Retrofits can include:

- * Home Insulation
- * Air-sealing
- * Windows and doors
- * Space and water heating
- * Renewable energy
- * Thermostats

Double your rebate

The **Canada Greener Homes Grant** provides funding towards the cost of an EnerGuide home energy evaluation and up to \$5,000 for eligible home retrofits.

The City of Regina's **Residential Retrofit Rebate Program** matches funding (up to \$5,000) for eligible work under the Canada Greener Homes Grant (see reverse for details)

➔ To be eligible, first sign up for the Canada Greener Homes Grant.

How to Participate

Step 1

Apply online at **Regina.ca/rebate** or in person at City Hall before June 30, 2022

Apply Now

What you need:

- Your Greener Homes Grant Applicant ID
- Your Property Tax Account Number (find on Regina.ca/propertysearch)

Successful participants will be notified after July 7, 2022. Funding is limited. Only 80 applications will be drawn.

Step 2

Complete your pre-retrofit EnerGuide evaluation and submit to the City within six (6) months of being accepted into the Retrofit Rebate Program

Remember, the EnerGuide evaluation is necessary for both programs.

Step 3

Proceed with your home retrofits.

You must:

- complete at least one (1) retrofit identified on your pre-retrofit evaluation
- complete a post-retrofit evaluation
- submit required documents to Canada Greener Homes Grant program.

Step 4

Submit Greener Homes Grant funding documents to the City of Regina for verification.

You have up to July 2023 to submit final documents.

The City will match the Greener Homes Grant funding up to \$5,000.
