The glockenspiel does not honour cultural diversity. It is a Northern European cultural symbol. When labelled glockenspiel, it is German. The glockenspiel encroaches on a shared acoustic resource (Victoria park and residential area) and does not respect the culture of the neighbourhood. Remember church belis of France, Italy, Poland, Austria, Hungary, etc., were seized by the Germans less than 80 years ago and used for war purposes and cultural genocide. Is playing Wagner in a synagogue appropriate? Give the glockenspiel its own space that does not take away from the acoustical space of other cultures. Do not try to bully the symbolism into a manufactured truth which disrespects many our cultural ancestors struggles. The German community is a vibrant part of Canada and deserves its own space and not aggressively force its way into that which is already saturated.  The glock enriches the downtown experience. Those who complain need to remember that life downtown means downtown noise. If they want quiet they should move to the suburbs.  It's beautiful, a great asset to the park. Keep keep keep.  It is been a lovely re-addition to Victoria Park and the downtown Plaza.  I live half a block from the Glockenspiel. With the _ in my condo unit closed, I can hear the Glockenspiel play, but at a low enough volume that it is not disruptive. Other downtown residents may be more directly impacted, so I am content to have the Glockenspiel limited to playing twice a day.  I think it is wonderful that we have this piece of history in our downtown. With the limited times it rings not many people get to enjoy it. Sunday often has the Knox Met bells tolling which are lovely as well. If you are not close to the bells you can't really hear them. Please share these bells more often.  I wouldn't mind it ringing more often. It doesn't ring for very long and it add something nice to the city scape and sounds. Please keep it ringing.  My husband and I really enjoy the glockenspiel.  I am so happy the Glockenspiel is back!  Up until this

I think the Glockenspiel is a lovely addition to the downtown.	Ø
While some downtown residents may live closer than I, and as a result be more directly impacted by the glockenspiel bells than I, I firmly believe that by making the choice to live downtown you are making the decision to accept, and hopefully embrace, the 'extras' that give a downtown a unique appeal to visitors to the City, and residents who may not experience the downtown environment regularly.	Ø
think it is a great addition to our city centre. I live downtown on the Scarth St. Mall and do not hear it if I am indoors. I would like to be able to hear it as often as it is rung. I wish it would ring on Sunday as well.	Ø
live within a few meters of the glockenspiel. The sound of the bells is very intrusive, very loud and very tuneless, even though I understand the glockenspiel is programmed to play a variety of tunes. I think the people who celebrate the glockenspiel's return don't live within earshot of it and are not subjected to its noise twice a day, six days a week. I am, and it provides no pleasure. Downtown noises are part of living downtown. Some are inevitable, but I find that many are gratuitous; the sound of clanging bells is one of them. During the debate about the Cook House, comments from people outside of the Crescents Area were discounted or given little weight. Council paid most attention to people directly affected. It should be the same for the glockenspiel. RDBID members, German Club members, downtown residents who can't hear the bells, and others who don't live downtown and thus only near the bells by choice, should not have a say in this review process. Unfortunately, you have constructed this survey so the responses can't be screened for respondents' location; as a result, the survey results will be completely unreliable. I am very disappointed by the 'rah-rah glockenspiel' tone of the undated, unsigned leaflet about the 'Glockenspiel Review of Programming' I found outside my door, that directed me to this survey. It does not objectively encourage me to articulate my views. In fact, it actively discourages me from doing so. The leaflet implies that if I do not like the glockenspiel, I am not committed to 'diversity and sharing of ethnic traditions'; that I do not honour immigrant history (as a first generation settler in Canada, I find this actively offensive) or cultural heritage or cultural vibrancy. None of these things is true. What I am is a downtown resident who is directly affected by loud noises that no one asked me about before they started. Why were downtown residents not asked for input when the glockenspiel's return was being planned?	Z
he noise coming from the Fat Badger's outdoor patio is so much more irritating	2
ove hearing the it ringing.	Ø
Ve have way too many cancel culture whiners.	Œ
The current schedule of ringing seems like a good compromise between the intended cultural symbolism, and the possible annoyance to people who live and work in close proximity and hear every note. We hope there will be no increase in the number of times it rings.	G
am more concerned about the construction (drilling and beeping vehicles) that frequently happens in the middle of the night (12am-4am).	G
This is such a lovely addition to downtown. I live across from Victoria Park and I have to say I haven't heard it ring but would like to. We are on the 14th floor of our building with _acing West. I look forward to _being open once summer comes and hope to hear it. I must say that anyone who complains about it is probably someone who complains about everything. Will they start to complain about the beautiful bells that ring from Know Metropolitan Church? Please do not change a thing other than perhaps letting it ring a little more offen. What a beautiful sound and a beuatiful addition to our downtown.	
he thing is great,keep it going	G
ove the Glockenspiel, the melody that it emanates is a nice sound	G
lice to see it back.	
am pleased we have it back. We missed it .	G
