Ward 4

2023 Construction Projects

Roads

These projects improve the quality of the road network. Through comprehensive assessments of the road structure, sidewalks, curbs and gutters, projects to improve the overall health of the road network are identified and implemented. Various programs are in place to ensure all types of roads are considered by focusing on both residential roads and more major roads (arterial and collectors).

For efficiency, road work is planned in collaboration with water, wastewater, and drainage projects in order to integrate infrastructure improvements.

In 2023, the City plans to renew 25.8 km of roads.

Road Renewal – Full or selected sidewalk, curb and gutter replacement, followed by paving.
- Assiniboine Avenue – Park Street to University Park Drive

Surface Treatment – Minimal concrete renewal may occur based on the maintenance distress inspection process prior to paving.
- Dorsey Place
- Fletcher Place
- Hanover Crescent – Westminster Road to Balmoral Gate
- Houston Road – Michener Drive to Penfold Place
- Moffat Bay
- Penfold Place

Traffic

These projects ensure continued safe movement of vehicles and pedestrians through Regina. Traffic infrastructure improvements include installing and upgrading traffic and pedestrian signals and increasing traffic capacity at intersections. This work is driven by studies, analysis and warrants, and growth predictions.

New Traffic Signals
- Chuka Boulevard and Green Jewel Boulevard

Traffic Calming
- Buckingham Drive – Essex Crescent to Essex Crescent (Driver feedback signage)

**Pedestrian Safety Enhancements**
- Assiniboine Avenue East and Park Street (Pedestrian Corridor)

**Permanent Pavement Marking**
- Winfield Road – Michener Drive to Assiniboine Avenue East
- Michener Drive – Windfield Road to University Park Drive

**Expressway Lighting**
- Ring Road – Assiniboine Avenue to Arcola Avenue

**Pedestrian Connectivity and Active Transportation**

These projects focus on connecting existing transit routes, multi-use pathways and schools. Investment in assets including pathways, on-street cycling and pedestrian connectivity supports the ability of residents to shift from single occupancy vehicles to active or public transportation modes.

**On-Street Cycling and Multi-use Pathways**
- Assiniboine Avenue – Park Street to Pilot Butte Creek (Multi use pathway)

**Wastewater & Drainage**

These projects renew and extend the life of our aging domestic and storm sewer infrastructure. The City uses a cleaning and inspection method to determine the condition of the underground infrastructure. Depending on the condition assessment, either relining or replacement techniques are selected. Sewer relining is a less invasive, more cost-effective, and efficient method than the traditional method of excavating and replacing the pipe (about one third the cost of full replacement). These processes renew the City’s pipes for another 50 plus years of service.

In 2023, the City plans to renew 11.0 km of domestic sewer and clean and inspect 110 km of domestic sewer and 20 km of storm sewer.

**Cleaning and Inspection**
- University Park neighbourhood between Ring Road and Pilot Butte Creek – domestic sewer mains

**Culvert Relining**
- Arens Road and Pilot Butte Creek Crossing

**Parks, Open Space and Recreation**
These projects enhance the quality of life in Regina by improving access to and quality of recreational infrastructure and ensuring open spaces are in a safe and useable condition. This is achieved through improvements to existing infrastructure and beautification initiatives.

**Tree Planting**
- 2501 Anaquod Road – Pacers Park Tree Planting and Landscaping
- 4070 Chuka Drive – Ripplinger Park Tree Planting and Landscaping

**Recreational Space Upgrades**
- 2635 E Philip Road – Sod replacement at Varsity Park
- 3201 Crosbie Crescent – Fence installation at Crosbie Park

**Cemeteries**
- 1101 E Assiniboine Avenue – Installation of new columbarium at Riverside Cemetery

Note - All project timelines are pending weather or other unforeseen circumstances. Some projects may have their scope modified or work deferred until later in 2023 or into 2024 if materials are delayed or the work cannot be completed to the satisfaction of the City of Regina.
