Ward 7

2023 Construction Projects

Roads

These projects improve the quality of the road network. Through comprehensive assessments of the road structure, sidewalks, curbs and gutters, projects to improve the overall health of the road network are identified and implemented. Various programs are in place to ensure all types of roads are considered by focusing on both residential roads and more major roads (arterial and collectors).

For efficiency, road work is planned in collaboration with water, wastewater and drainage projects in order to integrate infrastructure improvements.

In 2023, the City plans to renew 25.8 kilometers of roads.

Road Renewal – Full or selected sidewalk, curb and gutter replacement, followed by paving.
- 6th Avenue North – Broad Street to Winnipeg Street
- Halifax Street – 5th Avenue North to 7th Avenue North
- Retallack Street – Avonhurst Drive to 2nd Avenue North

Road Rebuild – Road structure renewal with or without underground infrastructure improvements, followed by full sidewalk, curb and gutter replacement, and followed paving.
- Halifax Street – 7th Avenue North to 8th Avenue North

Maintenance Pave – Road surface treatment for smoother safer roads for drivers and cyclists.
- Dover Avenue – Montreal Street to Dover Avenue End
- Ottawa Place – 8th Avenue North to Ottawa Place End
- Quebec Street – Dover Avenue to Quebec Street End
- St John Place – Dover Avenue to St John Place End

Traffic

These projects ensure continued safe movement of vehicles and pedestrians through Regina. Traffic infrastructure improvements include installing and upgrading traffic and pedestrian signals and increasing traffic capacity at intersections. This work is driven by
studies, analysis and warrants and growth predictions.

**Signal Rehabilitation**
- Albert Street and 5th Avenue North

**Pedestrian Safety Enhancements**
- 6th Avenue North and Garnet Street (Pedestrian Corridor)
- Broad Street and Fairview Road (Pedestrian Corridor)

**Permanent Pavement Markings**
- Lewvan Drive – 1st Avenue North to Sherwood Drive

**Water**

These projects help maintain and improve the water system to ensure safe, clean drinking water throughout our community. In addition to stand-alone water construction projects, water system improvements are completed in conjunction with road construction. The technology used is determined based on best value. Technologies can include low-dig methods, such as relining and directional drilling, or open trench construction.

In 2023, the City plans to reline 5.1 km of watermains, replace 4.8 km of watermains, replace 117 poly B service connections and replace 220 City-side lead service connections.

**Watermain Renewal**
- 3rd Avenue North - Robinson Street to Retallack Street
- Garnet Street – 4th Avenue North to Perry Avenue
- Retallack Street – Avonhurst Drive to 3rd Avenue North
- Robinson Street - 3rd Avenue North to Retallack Street

**Lead Connection Replacements**
- 3rd Avenue North – Robinson Street to Retallack Street

**Eastern Pressure Zone Solution**
New servicing for development in the East and Northeast of the City.
- Please refer to the council map for locations

**Wastewater & Drainage**

These projects renew and extend the life of our aging domestic and storm sewer infrastructure. The City uses a cleaning and inspection method to determine the condition of the underground infrastructure. Depending on the condition assessment, either relining or replacement techniques are selected. Sewer relining is a less invasive, more cost-effective, and efficient method than the traditional method of excavating and
replacing the pipe (about one third the cost of full replacement). These processes renew the City’s pipes for another 50 plus years of service.

In 2023, the City plans to renew 11.0 km of domestic sewer and clean and inspect 110 km of domestic sewer and 20 km of storm sewer.

**Northeast Neighbourhood Drainage Improvement**
Upgrades to water, wastewater, drainage infrastructure and roads to improve drainage.
- 2nd Avenue North – Osler Street to Toronto Street
- McKinley Avenue – St John Street to Ottawa Street
- St John Street – McKinley Avenue to 2nd Avenue North

**Facilities**
These are projects to maintain the integrity of City facilities to ensure programs and services can continue to be delivered. Projects include roof replacements and structural, architectural, mechanical, electrical and code or safety improvements.

**Facilities Upgrades and Construction**
- 160 Broad Street – NE Community Centre
- 560 Elphinstone Street – Installation of a shade structure at the former Regent Par 3
- 750 Winnipeg Street North – Kaplan and Mount Pleasant Support Facilities Upgrades

**Parks, Open Space and Recreation**
These projects enhance the quality of life in Regina by improving access to and quality of recreational infrastructure and ensuring open spaces are in a safe and useable condition. This is achieved through improvements to existing infrastructure and beautification initiatives.

**Irrigation Upgrade**
- 144 McInnis Crescent - McInnis Park irrigation upgrades
- 19 Lorimer Crescent - Lorimer Park irrigation upgrades

**Tree Planting**
- 8th Avenue North and Halifax Street – Saint Anne's Park tree replacement
- Lewvan Drive – Ring Road to 1st Avenue tree replacement

Note - All project timelines are pending weather or other unforeseen circumstances. Some projects may have their scope modified or work deferred until later in 2023 or into 2024 if materials are delayed or the work cannot be completed to the satisfaction of the City of Regina.
