Ward 8

2023 Construction Projects

Roads

These projects improve the quality of the road network. Through comprehensive assessments of the road structure, sidewalks, curbs and gutters, projects to improve the overall health of the road network are identified and implemented. Various programs are in place to ensure all types of roads are considered by focusing on both residential roads and more major roads (arterial and collectors).

For efficiency, road work is planned in collaboration with water, wastewater and drainage projects in order to integrate infrastructure improvements.

In 2023, the City plans to renew 25.8 km of roads.

Road Renewal – Full or selected sidewalk, curb and gutter replacement, followed by paving.
- 1st Avenue North – McCarthy Boulevard to Lewvan Drive
- Mikkelson Drive – Dorothy Street to McCarthy Boulevard
- Lewvan Drive – Regina Avenue to 11th Avenue

Maintenance Pave – Road surface treatment for smoother safer roads for drivers and cyclists.
- 3rd Avenue – 3rd Avenue End to Campbell Street
- Clarke Street – 8th Avenue to Dorothy Street
- Garry Street – 4th Avenue to 3rd Avenue
- Le Jeune Place – Krauss Street (South Leg) to Krauss Street (North Leg)
- Straub Crescent – Mikkelson Drive/Straub Street to Read Avenue

Traffic

These projects ensure continued safe movement of vehicles and pedestrians through Regina. Traffic infrastructure improvements include installing and upgrading traffic and pedestrian signals and increasing traffic capacity at intersections. This work is driven by studies, analysis and warrants and growth predictions.

New Traffic Signals
- REAL Grounds – please refer to the [online council map](#) for locations
Pedestrian Safety Enhancements
• Sherwood Drive and Hastings Crescent

Permanent Pavement Markings
• McCarthy Boulevard – Dewdney Avenue to Brunskill Place

Wastewater & Drainage
These projects renew and extend the life of our aging domestic and storm sewer infrastructure. The City uses a cleaning and inspection method to determine the condition of the underground infrastructure. Depending on the condition assessment, either relining or replacement techniques are selected. Sewer relining is a less invasive, more cost-effective, and efficient method than the traditional method of excavating and replacing the pipe (about one third the cost of full replacement). These processes renew the City’s pipes for another 50 plus years of service.

In 2023, the City plans to renew 11.0 km of domestic sewer and clean and inspect 110 km of domestic sewer and 20 km of storm sewer.

Domestic Sewer Renewal
Several small locations on residential streets are scheduled for domestic sewer relining in 2023. Please refer to the online council map for details.

South Trunk Capacity Upgrade Project
• A.E. Wilson Park West of McCarthy Boulevard. Please refer to online council map for details.

Facilities
These are projects to maintain the integrity of City facilities to ensure programs and services can continue to be delivered. Projects include roof replacements and structural, architectural, mechanical, electrical and code or safety improvements.

Facilities Upgrades and Construction
• 1010 McCarthy Boulevard – Jack Hamilton Arena upgrades and Tennis court refurbishment

Parks, Open Space and Recreation
These projects enhance the quality of life in Regina by improving access to and quality of recreational infrastructure and ensuring open spaces are in a safe and useable condition. This is achieved through improvements to existing infrastructure and beautification initiatives.
Recreational Space Upgrades

- 6618 7th Avenue – A.E. Wilson soccer field sod replacement

Note - All project timelines are pending weather or other unforeseen circumstances. Some projects may have their scope modified or work deferred until later in 2023 or into 2024 if materials are delayed or the work cannot be completed to the satisfaction of the City of Regina.
